

Solución del ERROR

La solución al error fue algo sencillo de solucionar

Fue borrar el archivo llamado Users que se creó junto al laravel

```
alu_torre1@08CTILB2200PC14 MINGW64 /c/xampp/htdocs/registro-usuarios
$ php artisan session:table
```

Y Cree una tabla de session

```
alu_torre1@08CTILB2200PC14 MINGW64 /c/xampp/htdocs/registro-usuarios
$ php artisan migrate:fresh

Dropping all tables ..... 40.53ms DONE

INFO Preparing database.

Creating migration table ..... 9.00ms DONE

INFO Running migrations.

0001_01_01_000001_create_cache_table ..... 11.96ms DONE
0001_01_01_000002_create_jobs_table ..... 31.05ms DONE
2025_08_25_135117_create_users_table ..... 11.60ms DONE
2025_08_25_135215_create_careers_table ..... 5.34ms DONE
2025_08_25_140615_create_sessions_table ..... 17.44ms DONE
```

Y darle Fresh para actualizar los datos de la base de datos y con eso dejaría ya hacerlo todo completo..

Y con esto ya nos dejaría entrar a nuestra tabla que hemos creado

AQUÍ EL PUT

The screenshot shows a REST client interface with a PUT request to `http://127.0.0.1:8000/api/register/1`. The request body is a JSON object with the following fields: `name`, `email`, `password`, `password_confirmation`, `career_id`, and `terms_accepted`. The response status is 200 OK, and the response body is a JSON object containing the created user data, including `id`, `name`, `email`, `career_id`, `terms_accepted`, `created_at`, and `updated_at`.

```
PUT http://127.0.0.1:8000/api/register/1

{
  "name": "Nuevo Nombre",
  "email": "nuevo.email@example.com",
  "password": "nuevaClave123",
  "password_confirmation": "nuevaClave123",
  "career_id": 2,
  "terms_accepted": true
}
```

```
{
  "data": {
    "id": 1,
    "name": "Nuevo Nombre",
    "email": "nuevo.email@example.com",
    "career_id": 2,
    "terms_accepted": true,
    "created_at": "2025-08-25T15:10:59.000000Z",
    "updated_at": "2025-08-25T16:43:19.000000Z"
  }
}
```

En el HeidiSQL se llena los datos de la carrera para que no este vacío

```
INSERT INTO careers (name, created_at, updated_at) VALUES
('Ingeniería en Sistemas', NOW(), NOW()),
('Medicina', NOW(), NOW()),
('Derecho', NOW(), NOW()),
('Arquitectura', NOW(), NOW());
```

Y con eso se implementa las carreras en la tabla

Carrera:

A dropdown menu with the title "Carrera:". The selected option is "Ingeniería en Sistemas". The menu is open, showing the following options: "Ingeniería en Sistemas", "Medicina", "Derecho", and "Arquitectura".

Y con esto ya funcionaria en web ya que los datos de la carrera no estarían vacíos
